

Please be advised that as a result of the United States Environmental Protection Agency (USEPA) expansion in 2010 of the list of toxic chemicals reportable under Section 313 of the Emergency Planning and Community Right to Know Act of 1986 (EPCRA), the chemicals listed below will be required to be reported on the following reporting forms for facilities regulated under the New Jersey Worker and Community Right to Know and Pollution Prevention Acts:

1. The Community Right to Know (CRTK) Survey - the substances or compound categories will be subject to reporting if they were present at 500 pounds or above at any one time.

**Due March 1, 2012**

2. The substances will also be subject to Toxic Chemical Release Inventory (TRI), Release and Pollution Prevention Report (RPPR), and Pollution Prevention (P2) Planning reporting requirements under the timeline described below for those facilities triggering reporting requirements:

1. Reporting Year (RY) 2011 - RY # 1 for the new substances on TRI & RPPR Sections A & B **due 7/1/2012**
2. RY 2012 - RY # 2 for the new substances on TRI & RPPR Sections A & B **due 7/1/2013**; since this is the 2nd consecutive year of reporting, new or revised P2 Plans and Plan Summaries are also expected if the facility is not in a new base year and the substance is used in a targeted process. If 2012 is a facility's base year, a new P2 Plan and Plan Summary must include the new substances.
3. RY 2013 - P2 Progress Reports (P2-115 or Sections C & D) are due on base year 2012 or new 5-year plans are due, as applicable. **Due 7/1/2014**
4. RY 2014 - P2 Progress Reports (P2-115 or Sections C & D) are due on base year 2012-13 or new 5-year plans are due, as applicable. **Due 7/1/2015.**

<u>Chemical Name</u>	<u>CAS #</u>
• 1-Amino-2,4-dibromoanthraquinone	81-49-2
• 2,2-bis(Bromomethyl)-1,3-propanediol	3296-90-0
• Furan	110-00-9
• Glycidol	556-52-5
• Isoprene	78-79-5
• Methyleugenol	93-15-2
• o-Nitroanisole	91-23-6
• Nitromethane	75-52-5
• Phenolphthalein	77-09-8
• Tetrafluoroethylene	116-14-3
• Tetranitromethane	509-14-8
• Vinyl Fluoride	75-02-5

- New chemicals added to the Polycyclic Aromatic Compounds (PACs) category (all chemicals present at the facility within a compound category must be combined to determine if the threshold has been exceeded) – the PACs category number is N590.

<u>Chemical Name</u>	<u>CAS #</u>
• 1,6-Dinitropyrene	42397-64-8
• 1,8-Dinitropyrene	42397-65-9
• 6- Nitrochrysene	7496-02-8
• 4- Nitropyrene	57835-92-4
